

Hi folks, it has been about a month since my last update. Not much has changed. We are waiting for a schedule from New Hampshire Electrical Cooperative (NHEC). In January they indicated that they would begin preparation activities in the May-June timeframe (which did start) and then begin construction soon afterwards and by the end of this year they would begin rolling out service to our residents. The rollout would continue into Q1 and Q2 of 2022.

NHEC indicated that they would serve 100% of Acworth including households that are not served by NHEC for electric service. They would also provide service to a small portion (less than 5%) that were not covered by the grant that NHEC was awarded. The grant also requires NHEC to provide telephone service.

Just as a reminder, everyone will have a choice to stay with their current internet and/or telephone service provider if they want too.

I have been told by NHEC that more information on their schedule and a communication plan will be coming in the next couple of weeks. Please stay tuned!! You can follow the progress on our town's Facebook page or on our town's website (address below). Also please visit our frequently asked questions (**FAQ**) for answers to questions.

THANK YOU!

Gregg Thibodeau
